

MODEL B SNUBNOSE Concrete Reclaimer

- Recommended for **Large Ready Mix Plants** operating 10-30 mixer trucks or more.
- 2-truck washout
- Up to 1 cubic yard per minute throughput

Set two Side-by-Side to create the **MODEL B² SNUBNOSE**

- Recommended for Large Ready Mix Plants operating 30-50 mixer trucks or more.
- 4-truck washout

Filter Presses also available

MODEL X2 SIX-SHOOTER Concrete Reclaimer

- Recommended for **Mid-Size Ready Mix Plants** operating 3-10 mixer trucks or more.
- 2-truck washout
- Up to 1/2 cubic yard per minute throughput

MODEL X1 SIX-SHOOTER Concrete Reclaimer

- Recommended for **Small Ready Mix Plants** operating 1-6 mixer trucks or more.
- Also used at **some precast plants** running mixer trucks, such as concrete pipe plants.
- 1-truck washout
- Up to 1/2 cubic yard per minute throughput

MODEL M6

- Recommended for use at **Precast, Pipe & Block, also works for You-Cart washout.**
- Up to 2-3 cubic yards per hour throughput
- Separates coarse and fine aggregates

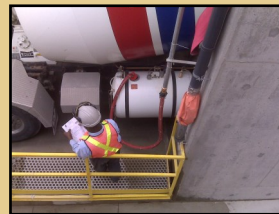

MODEL R2

- Recommended for use at **Precast, Pipe & Block, also specialty mix plants such as GFRC.**
- Up to 2-3 cubic yards per hour throughput
- Does not separate coarse and fine aggregates.

MODEL S3 SLURRY SEPARATOR

- Remove solids/fines from slurry
- Flocculants and Flocc feeders
- Many models and designs available, including tanks, agitators, automated on/off stations, mixer wash-out and many more.

WATERDOG AUTO SHUT-OFF

- Eliminate over-filling your mixer truck tanks
- Designs for both city water or well systems
- SAVES WATER!

MODEL P CO₂-based pH CONTROLS

- Lower pH for re-use or disposal (where permitted)
- Uses CO₂, not acid—no hazardous materials or employee exposure.
- Works well with a concrete reclaimer settling pond or filter press system to provide the **total system solution!**
